Application/Control Number: 10/659,822

Art Unit: 2617

## **ADVISORY ACTION**

On page 2 lines 19-20, of Applicant's Remarks, Applicant argues that Sasano/Silverman fails to teach a "method of managing a plurality of directory numbers for a mobile station".

On page 3 lines 6-7 Sasano/Silverman fails to teach "associating said first directory number with an identifier code". And "transmitting a query to a call control system, said query identifying said first directory number".

On page 4 lines 1-2 and 6 Sasano/Silverman fails to teach "transmitting over an air interface a first message to said mobile station, said first message including said identifier code and recognized by said mobile station".

Examiner respectfully disagrees. The examiner must give the broadest reasonable interpretation to all claims 1, 9, and 14 that Sasano teaches such circumstances method that managing a plurality of directory numbers for a communication terminal, in which equates to a mobile station (See Col. 3, line 15-39). Moreover, Sasano/Silverman teach the concept of the invention but do not disclose the use for a mobile station.

However, as examiner highly noted that on the Office Action filed on June 5, 2006 that Sasano does not disclose the use of mobile station. Furthermore, Sasano teaches the concept of transmitting a first message (i.g. incoming call that includes the sub-address) to the telephone system and/or terminal, the message including the ID

Application/Control Number: 10/659,822

Art Unit: 2617

code to indicate that the first directory number being called (displaying specified subaddress, called or caller's phone number), (See an Office Action filed on June 5, 2006).

Therefore, it would have been obvious to one of ordinary skill in the art to modify of Sasano concept by using different network environment, such as a wireless network.

In response to applicant's Remarks/Arguments, an applicant argued that Sasano/Silverman fails to teach the "transmitting a query to a call control system, said query identifying said first directory number" on page 4, line 9-10.

Examiner respectfully disagrees. The examiner must give the broadest reasonable interpretation that the combination of Sasano/Silverman, and in further view of Zimmerman teach the transmitting a query to a call control system, said query identifying said first directory number such as Mobile Switching Center (MSC), Service Control Point (SCP), and Home Location Register (HLR), See figures 1-6, paragraph [0023-0044], of Zimmerman, and (See Col. 1, line 16-25, and Col. 7, line 5-32) of Silverman.

In response to applicant's Remarks/Arguments, an applicant argued that Sasano/Silverman fails to teach the "transmitting over an air interface a first message to said mobile station, said first message including said identifier code" on page 5, line 5-7, and "an identifier code recognized by said mobile station" on page 5, line 13.

However, the examiner must give the broadest reasonable interpretation, and highly noted that on the Office Action filed on June 5, 2006 that Sasano does not disclose the use of mobile station. Furthermore, Sasano teaches the concept of

Application/Control Number: 10/659,822

Page 4

transmitting a first message (i.g. incoming call that includes the sub-address) to the

telephone system and/or terminal, the message including the ID code to indicate that

the first directory number being called (displaying specified sub-address, called or

caller's phone number), (See an Office Action filed on June 5, 2006).

Therefore, it would have been obvious to one of ordinary skill in the art to modify

of Sasano concept by using different network environment, such as a wireless network.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Michael T. Vu whose telephone number (571) 272-8131.

The examiner can normally be reached on 8:30 AM – 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Joseph Feild can be reached on (571) 272-4090. The fax phone numbers

for the organization where this application or proceeding is assigned are

(571) 272-8300.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is

(571) 272-9000.
